pandoc を install するシェルスクリプト (コード 1)。

コード 1 pandoc_installer.sh

```
1  #!/bin/bash
2  function pandoc_install() {
3      local readonly arch="$1"
4      if [ "${arch}" != "amd64" ] && [ "${arch}" != "arm64" ]; then
5          echo "ERROR: The first argument must be either amd64 or arm64."
6          echo "ERROR: Failed to install pandoc."
7          return 0
8      fi
9      local readonly pandoc_url=$(
10         curl -s https://api.github.com/repos/jgm/pandoc/releases/latest \
11             | grep "browser_download_url.*${arch}.deb" \
12             | cut -d : -f 2,3 \
13             | tr -d \ \
14     )
15     local readonly pandoc_file_name=$(
16         echo ${pandoc_url} | gawk 'match($0, /\([^\/]+\)$/ , a){print a[1]}'
17     )
18     wget ${pandoc_url}
19     apt-get install -y "./${pandoc_file_name}"
```

```
20     rm ${pandoc_file_name}
21     return 0
22 }
```
